Precipitation probability							
90%	80%	70%	70%	30%	20%	20%	20%

Forecast for Sunday 26 Dec 2021

Weather: Snow overnight, with risk of blizzard conditions on the tops, but turning to rain on lower slopes by end of night. A dull start, snow on the tops at first but turning to rain or drizzle at all heights in morning and becoming patchy. A few bright or perhaps sunny spells developing in afternoon with rain turning to a few showers, but still a good deal of hill fog around and perhaps the odd heavy shower, with risk of hail and thunder.

Chance of cloud free mountain/hill tops above 600m: Nil becoming 30 or 40% in afternoon

Visibility: Moderate or poor, becoming mostly good beneath cloud through the morning, but very poor at height, with extensive cloud down to 400m, possibly 200m at first. Cloud base mostly lifting to 500-700m by the afternoon but still some patches down to 400m.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Becoming milder with winds falling light, but still a significant chill at height well into the day. Navigational difficulties to be expected with snow at height at first and rather extensive hill fog.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Sat 25 Dec 2021	7.6mm	10mm	14.2mm

Forecast for Monday 27 Dec 2021

Weather: Dry with a few clear spells developing in early hours but patchy fog could form and cloud thickening later in night. Cloud soon thickening and lowering in morning to bring outbreaks of rain, but probably a drier spell in the afternoon and also becoming generally dry in evening, although areas of hill fog persisting

Maximum wind: Southeast 5-15mph becoming easterly 5-10 in morning, but north or northeast 5mph in evening.

Chance of cloud free mountain/hill tops above 600m: 60%, decreasing 10% or less in morning, but 30% later

Visibility: Good becoming moderate in rain and very poor at height with cloud soon lowering from 700m to 450m and becoming extensive in morning, with patches down to 300m at times, though cloud more broken later.

Temperature: **Valleys:** Plus 4 C rising to plus 9 C
At 600m: Plus 6 C, later plus 4 C
Freezing level: Above the tops, falling to 900m later
